~~CONFIDENTIAL~~

COUNTRY Yugoslav

SUBJECT Observation Station
on Murter Island

CD NO. 25X1A

DATE DISTR 25 APR 51

NO. OF PAGES 1

NO. OF ENCLS
(LISTED BELOW)SUPPLEMENT TO 25X1X
REPORT NO.

25X1A

1. The Murter observation station is located on Radic Height on the Island of Murter near Sibenik. The station is equipped with a W/T set, a heliograph and a searchlight. The permanent crew of the station is made up of 20 sailors.
2. The Murter station maintains connections with observation stations on Pasman Island and Zirje Island. The Island of Murter has no fortifications or military garrison, apart from the crew of the station.

25X1A

Comment: This report does not agree with information from other sources that a covered battery with a cannon platform and other installations were constructed on Murter Island in 1936. All projects are underground, and the platform is the only covered platform in the entire fortification system of Sibenik. A long 150 mm. cannon is also reportedly located on Murter Island.
